

LIP

Lightning Isolator for 12VDC Power

Key Features

- Protect DC Power
- Substantial savings on the cost of the cable itself

Specification	
Power Input	Terminal
Protection	12 VDC 1A
Power Output	Terminal
Dimensions (W x H x D)	48 x 27 x 19mm
Weight (g)	18g

LIPP

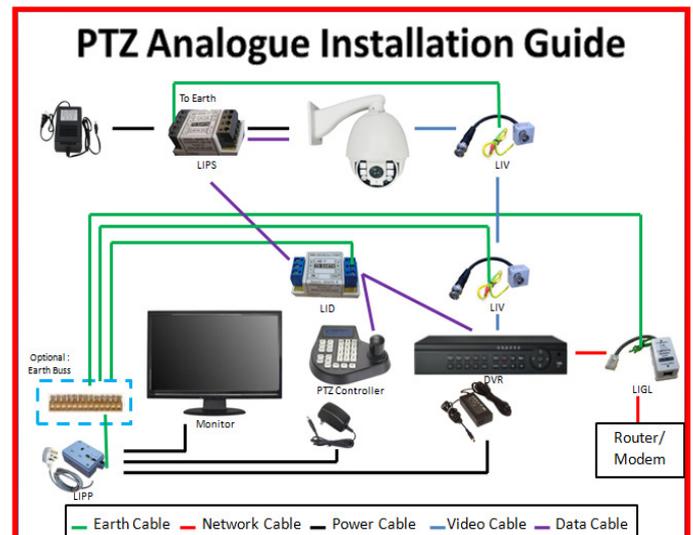

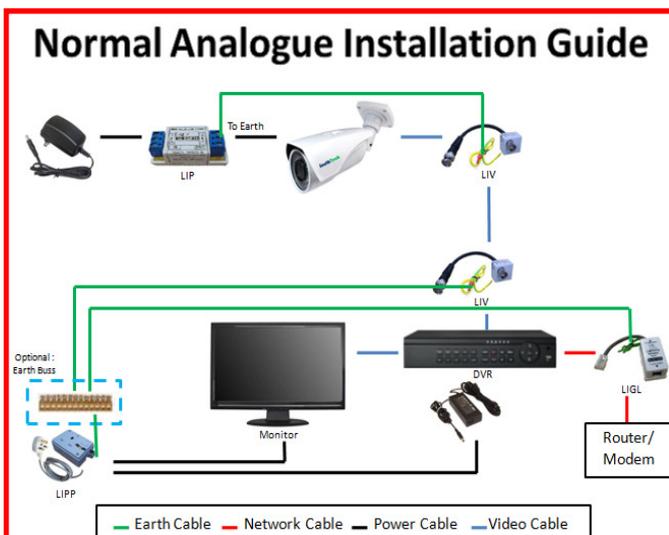

Lightning Isolator for 230VAC Power

Key Features

- Protect AC Power
- Substantial savings on the cost of the cable itself

Specification	
Connection	Power Plug & AC Cable
Protection	230 VAC 5A
Dimensions (W x H x D)	75 x 64 x 42mm
Weight (g)	253g

- Please note that the earth is a Floating Earth - Patented Technology used together with this range of Lightning Isolator only, which should never be mixed with conventional grounding earth or any other earth as mixing it would result in undesirable effects - worst case nullifying the protection.
- The earth cables have to be properly connected to ensure maximum protection. Earth cables should be as short as possible.
- All green lines must go directly (not looped) through this ground reference at the power lightning isolator or earth buss where applicable.
