

Model : SSD02

HD 2Ch Signal SuperImpose

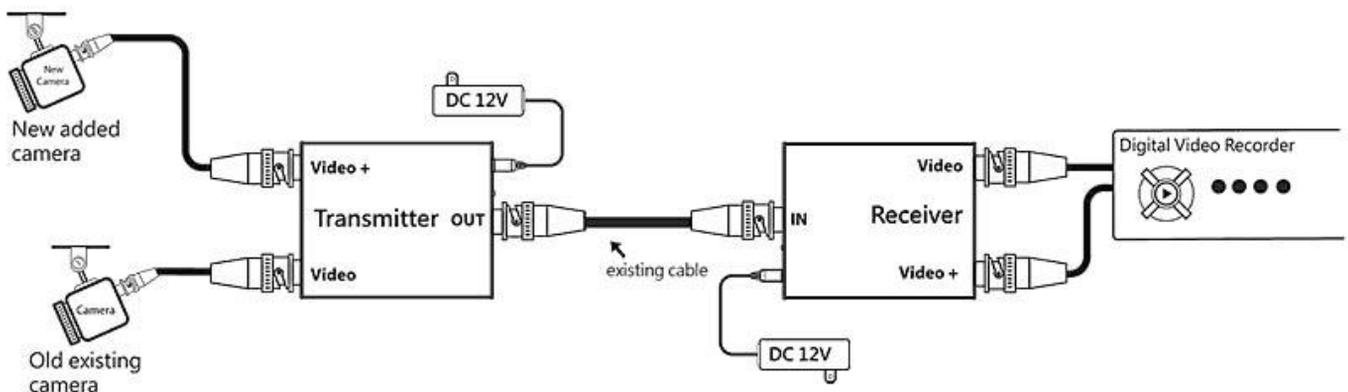

Key Features

- ▶ It supports 2 channel video signal in one coaxial cable by way of Frequency Division Multiplexing with all data transmission real-time and all image high-definition and non-delay.
- ▶ It is suitable for improvement of old projects and building under new projects.
- ▶ It is designed according to projects with minimum installation volume requirement.
- ▶ 2 Ch Video in one coaxial cable transmission.
- ▶ Perfect support coaxial video line, 75-3, 75-5, RG59 wire, etc.

Technical Specification

| | |
|-----------------------|---------------------------------------|
| Compatible mode | AHD 1080p/ TVI 1080p/ CVI 1080p/ CVBS |
| Power Supply Input | DC12C/ 1-2A |
| Transmission distance | 0-200m adaptive |
| Operating Temperature | -30°C ~50°C |
| Shell material | High quality aluminum alloy |
| Product Dimension | 64 x 43 x 23 mm |
| Product Weights | 67.5g |
